Efficient Indoor Comfort Solutions  
for Unique Applications

# Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A

leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

For comfort in unique indoor applications, Carrier offers the Performance™ series ductless under ceiling air conditioner or heat pump. It's a versatile, quiet and economical choice for delivering comfort to areas where typical forced-air systems can't.

## Designed to Fit

1

2

### 1 Ceiling-Hugging Design

An ultra-slim profile of less than 10" high blends into your ceiling, drawing as little attention as possible. It's a perfect fit for areas with no ductwork and interior rooms requiring up to 200-foot refrigerant runs to the outdoor unit. And, a condensate pump helps facilitate installations away from outside walls.

### 2 Maximum Flexibility

Carrier delivers maximum installation flexibility with the widest range of sizes in the industry – 1.5-ton units up to 5-ton units. Programmable 24-volt thermostat and three indoor fan speeds provides precise comfort when and where you need it. And, Carrier is the only manufacturer to offer electric heat on all sizes of under ceiling heat pumps.

## Versatile, Economical Performance

Perfect for a restaurant, gym, school, garage or more, the Carrier® ductless under ceiling air conditioner or heat pump provides fully-featured comfort with 13.0 SEER cooling efficiency. It uses Puron® refrigerant, an environmentally sound alternative to R-22 refrigerant. And, it's an economical choice that provides comfort when you need it. In addition, an available low-ambient kit allows operation down to an industry-leading -20° F outdoor temperature.

## Quiet Comfort for Busy Environments

With indoor operation as quiet as 47 dBA, the Performance series ductless under ceiling air conditioner or heat pump can be quieter than a conversation. Offering a slim-profile design, easy and versatile installation and the backing of the world's first name in comfort, this system is a great, economical choice for your unique heating and cooling needs.

## Limited Warranty

To the original owner, Carrier warrants its ductless products with a five-year parts and seven-year compressor limited warranty. See warranty certificate at [carrier.com](http://carrier.com) for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.
