Efficient Indoor Comfort Solutions
for Unique Applications

Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

For comfort in unique indoor applications with suspended ceilings, Carrier offers the Performance™ series ductless in-ceiling cassette air conditioner or heat pump. It's an elegant, quiet and economical choice for delivering comfort to areas where typical forced-air systems can't.

Designed to Fit

1 Unobtrusive Design

The indoor unit's grille blends into your ceiling without drawing attention. It's a perfect fit for areas with no ductwork and interior rooms requiring up to 200-foot refrigerant runs to the outdoor unit. And, it's easy to install and even easier to maintain because you are just two screws away from access to controls.

2 Easy, Effective Comfort

Indoor temperatures are set with easy-to-use wired or wireless controls. Motorized louvers can remain stationary or move continuously to provide outstanding air distribution and throw, with airflow directed 2, 3 or 4 ways as needed. For flexibility, a side opening can be used to heat or cool adjacent rooms and for enhanced reliability, a built-in condensate pump ensures adequate drainage.

Versatile, Economical Performance

Perfect for an office, lobby, conference room or any room with a suspended ceiling, the Carrier® ductless in-ceiling cassette provides fully-featured comfort with 13.0 SEER cooling efficiency. It uses Puron® refrigerant, an environmentally sound alternative to R-22 refrigerant. And, it's an economical choice that provides comfort when you need it. It's also a versatile system that offers optional power ventilation, as well as operation down to an industry-leading -20° F outdoor temperature with our available low-ambient kit.

Quiet Comfort for a Professional Environment

With extra-quiet indoor operation as low as 31 dBA, the Performance series ductless in-ceiling cassette air conditioner or heat pump can be as quiet, or quieter, than a whisper. Offering an unobtrusive design, easy and convenient operation and the backing of the world's first name in comfort, this system is a great economical choice for your unique heating and cooling needs.

Limited Warranty

To the original owner, Carrier warrants its ductless products with a five-year parts and seven-year compressor limited warranty. See warranty certificate at carrier.com for complete details and restrictions. Be sure to ask your Carrier dealer about optional labor warranties.

Models 40KMC, 40KMQ, 38HDF, 38QRF © Carrier Corporation 7/2012 01-DFS-028-01
