

Air Conditioners ~ R-22 Dry-Charged*

Right for You

How can we say that Payne knows what's right for you? The answer is experience. D.W. Payne and sons started making the right products for their west coast customers back in 1914. Since that time, we've expanded nationwide with a brand that provides affordable products that work. These principles apply to our family of air conditioners. Because this solid lineup of cooling equipment carries the Payne name, you can be sure it's the right product at the right price, right for you.

Cool Comfort

Comfort is important to all of us. After all, who doesn't enjoy the refreshing feel of an air conditioned home on a scorching summer day? That's why Payne offers a complete family of affordable central air conditioners.

The most popular unit in our lineup is the PA13NR. Attractive and designed to last, this is one smooth-running, energy-saving cooling machine.

From the first time you turn it on, you'll enjoy the comfort of your home undisturbed because the PA13NR operates so quietly. At the same time, this economical unit conserves electricity at 13 SEER* (Seasonal Energy Efficiency Ratio). Just like gas mileage for a car, SEER ratings let you compare fuel efficiency of air conditioners - the higher the SEER, the better the efficiency. And you can expect the savings to continue for years because Payne products are designed, built and tested for long lasting operation.

*When matched with "AHRI-listed" indoor coil.

MODEL PA13NR

*Unit is shipped with Nitrogen charge only

Payne is the Best Choice

Payne offers the right products at the right price, offering dependable, comfortable and efficient cooling summer after summer. So make the decision easy on yourself - choose Payne. When you do, you're choosing a long-standing history of indoor comfort products that are just right for you.

Our Warranty

The Model PA13NR is covered with a 5-year limited parts warranty. Warranty applies to the original owner. Visit www.payne.com for details.

What You Get with Payne...

- 1 Long-Lasting Fan Motor**
Our high-efficiency fan motor contributes to the performance of the PA13NR by braving the summer's heat for years of durable operation.
- 2 Neighbor-Friendly Design**
Your neighbors will appreciate the quiet operation, thanks in part to our specially designed fan blades. Our exclusive design improves economy and reduces noise associated with turbulent air movement.
- 3 Attractive Finish**
The PA13NR looks good today, and will continue to look good for years. The corrosion-resistant finish is pre-painted.
- 4 Built-to-Last Compressor**
Count on years of cooling comfort because the most important component of the entire unit, the compressor, operates quietly and reliably with built-in protective features.
- 5 Smooth, Quiet Operation**
Rubberized isolation pads create a buffer between the base pan and the compressor to minimize noise from vibrations.

Compact Size

The compact size of the PA13NR helps it blend into your landscape. We have made this unit smaller without sacrificing performance by using a highly efficient heat transfer process.

Before purchasing this appliance, please read the important energy cost and efficiency information available from your dealer. Manufacturer reserves the right to discontinue, or change, at any time, specifications or designs without notice and without incurring obligations.
