Performance  
SERIES

Efficient Indoor Comfort Solutions  
for Unique Applications

# Innovation and the Environment

Over 100 years ago, a humble but determined engineer solved one of mankind's most elusive challenges by controlling the indoor environment. A

leading engineer of his day, Dr. Willis Carrier would file more than 80 patents over the course of his career. His genius would

enable incredible advancements in health care, manufacturing processes, food preservation, art and historical conservation, indoor comfort and much more.

Carrier's foresight changed the world forever and paved the way for over a century of once-impossible innovations. Yet in addition to being an accomplished inventor, he was also an avid outdoorsman. Carrier recognized the power and beauty of the natural environment. This appreciation of our world and its resources continues to guide Carrier Corporation today. We will never rest on our accomplishments, but instead consistently look for ways to improve our products, our environment and our world.

For improved comfort in unique indoor applications, Carrier offers the Performance™ series ductless high wall air conditioner or heat pump. It's an elegant, quiet and economical choice for delivering heating and cooling to areas typical forced-air systems can't.

## Designed to Fit

### 1 Unobtrusive Design

Designed to mount on a wall and blend into any interior with its smooth, clean profile, the indoor unit includes motorized louvers that can "sweep" to spread conditioned air throughout the space or they can be "locked-in" to focus on a specific area. It's easy to maintain, too, with an easy-to-remove filter that can be cleaned in any sink. Plus, it's a great fit for interior spaces with up to a 200-foot distance to the outdoor unit.

### 2 Easy, Effective Comfort

Indoor temperatures are set with the intuitive, easy-to-use remote. The system automatically responds to changes in room temperature as needed to keep occupants comfortable. Dehumidification mode enhances comfort during hot, sticky summers. And, our available low-ambient kit allows continued operation down to an industry-leading -20° F outdoor temperature.

## Versatile, Economical Comfort

When you need comfort in a new or converted space and ductwork is not available or not an option, Carrier delivers with the Performance series ductless high wall air conditioner or heat pump. Perfect for an office, a restaurant, a garage, a vestibule or more, this system provides fully-featured comfort with 13.0 SEER cooling efficiency. It uses Puron® refrigerant, an environmentally sound alternative to R-22 refrigerant. And, whether your new space is a well-used work space or a seldom-used conference room, it's an economical choice that can provide comfort when you need it.

## Extra-Quiet, Relaxing Comfort

With extra-quiet indoor operation as low as 38 dBA, the Performance series ductless high wall air conditioner or heat pump can be as quiet, or quieter, than a whisper. Offering an unobtrusive design, easy and convenient operation and the backing of the world's first name in comfort, this system is a great, economical choice for your unique heating and cooling needs.

## Limited Warranty

To the original owner, Carrier warrants its ductless products with a five-year parts and seven-year compressor limited warranty. See warranty certificate at [carrier.com](http://carrier.com) for complete details and restrictions. Be sure to ask your Carrier® dealer about optional labor warranties.
