

# Performance™ 95 Gas Furnace

Turn to the Experts.™

Performance™  
SERIES

Enjoy Consistent, High-Efficiency Comfort and Savings

# Things to Consider Before You Buy

## Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. Your Carrier® dealer can help you choose the best system for your home, including a Performance™ 95 gas furnace with Carrier-exclusive features that further enhance your indoor environment.

- Two-stage furnace technology and variable speed blower allow the Performance 95 gas furnace to deliver extra-efficient, extra-consistent comfort
- Nearly continuous low-heat operation conserves energy and operates quietly. As temperatures drop, the furnace automatically adjusts to high-heat operation to maintain warm, soothing comfort
- For additional comfort during the cooling season, the variable speed fan can help maximize humidity control when paired with a condensing unit, and continuous fan operation can improve indoor air quality all year long

## Federal Tax Credits

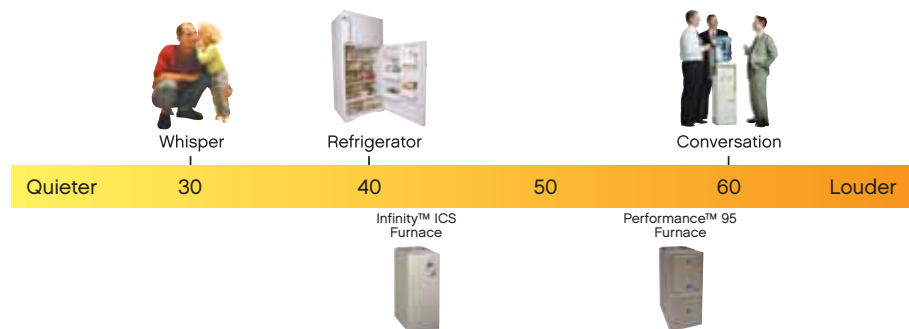

Selected models of the Performance 95 gas furnace meet the minimum heating efficiency of 95.0% AFUE to qualify for federal income tax credits. Not only will you benefit from warm, winter comfort, you can save money now with tax credits and continue saving for years with extra-economical gas efficiency.

- Between now and December 31, 2010, qualifying 95.0% AFUE gas furnaces are eligible for a tax credit equal to 30% of installed equipment and labor costs
- A maximum credit of \$1,500 can be earned with a qualifying purchase
- Tax credits are a dollar-for-dollar reduction in your tax bill, not a deduction that may only affect the percentage you pay
- Your Carrier dealer can help you select the tax credit-eligible equipment that best fits your needs. An accounting professional can help determine how your purchase will affect your tax liability

## Sound

Carrier high-efficiency furnaces are designed to deliver a total home comfort experience, including extra-quiet operation. The sealed combustion system and nearly continuous low-speed blower operation make comfort “easy on the ears.” To help seal the deal, our sturdy steel cabinet, solid door and insulated blower cavity ensure relaxing comfort with minimal sound from operation.

## Comparative Sound Ratings (decibels)

Carrier manufactures gas furnaces that are among the quietest in the industry. We test our products in a sound laboratory specifically built to resemble a typical residence. Sound level recordings produced at steady state, low fire operation (the most common operating condition), measured 3 feet from furnace. Other sound levels, mentioned for comparison, as published at <http://www.nidcd.nih.gov/health/hearing/ruler.asp>.

Model 58HDV

## Technology

- 1 **Burner ignition** – as one of the most robust and durable ignition systems available, Power Heat™ hot surface ignition replaces a pilot light for enhanced reliability and reduced utility consumption.
- 2 **Comfort-monitoring control board** – tracks system operation and adjusts to changing conditions to maintain comfort and energy efficiency.
- 3 **Two-stage gas valve** – helps ensure quiet operation and efficient, reliable performance.
- 4 **Two-speed inducer fan** – controls air intake at two different speeds within the combustion system for efficient performance.
- 5 **Sealed combustion system** – reduces cold air infiltration while providing quieter operation.
- 6 **Two heat exchangers** – extract heat from the gas you use and transfer it to warm the air. The primary heat exchanger extracts 80% of the heat while the secondary heat exchanger extracts an additional 12 - 16%, helping to ensure efficient, reliable comfort.
- 7 **Energy-saving blower** – the electronically controlled, programmable blower provides airflow optimized for your home's needs. The blower motor offers higher efficiency performance than most standard PSC-type motors.
- 8 **Carrier reliability** – Within every step of the development process from design to assembly of finished products, we test every furnace to exceed industry standard requirements.

## Models Achieving 95.0% AFUE Qualify for Tax Credit

MODEL	DOWNFLOW EFFICIENCY	HORIZONTAL EFFICIENCY
58HDV036060	95.0% AFUE	95.0% AFUE
58HDV036080	95.0% AFUE	95.0% AFUE
58HDV048080	95.0% AFUE	95.0% AFUE
58HDV060100	95.0% AFUE	95.0% AFUE

Most models of the 58HDV gas furnace meet the 95.0% AFUE minimum efficiency required for the federal tax credit. Your dealer will help decide which model best fits your needs.

## Limited Warranty

To the original owner, the Carrier® Performance™ 95 gas furnace is covered by a 10-year parts limited warranty and lifetime heat exchanger parts limited warranty upon timely registration of your new equipment.\* The secondary heat exchanger carries a 20-year labor limited warranty. Ask your Carrier dealer about optional extended warranties, which may include labor.

\* Warranty period is a five-year on parts and 20-year on heat exchangers if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty and a lifetime parts limited warranty on the heat exchangers. See warranty certificate at carrier.com for complete details.

## Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
